

WORK HISTORY

- ENGINEER**
FEB 17 - NOW

 **Beamery Ltd, London**
 - Full stack engineering for Beamery, the world's most advanced sourcing and recruitment marketing platform, empowering companies to treat candidates like customers.
 - Co-lead and developed candidate-facing "Beamery Pages" talent marketing product within months which has already seen its first hire.
 - Direct solutions communication with customers including Facebook, Balfour Beatty, Grab and Greenhouse.
 - Developed advanced UI for contacts filtering (Angular component architecture/Elasticsearch). Real time notifications through socket.io, RabbitMQ and Redis. Significant player in the road to CI as well as developing Beamery's own pair programming process.
 - Established end-to-end testing practices and framework with Selenium and Cucumber. Boosting public API test coverage and directly handling API consumer issues.
 - Took ownership of open source Node.js Apache Tika bridge library from The International Consortium of Investigative Journalists.
 - Running the first company-wide knowledge sharing session on Natural Language Processing.
- ENGINEER**
MAR 16 - FEB 17

 **Sony Interactive Entertainment Europe (PlayStation/SIE R&D West), London**
 - Full stack engineering for PlayStation's best-in-class developer support platform.
 - Thought leader and individual responsibility for application's long term frontend strategy: build process, dependency management, migration of tightly coupled frontend/backend code to APIs and Angular clients, universal JavaScript and ES2015 transpiling.
 - Greenfield AWS event-driven architecture API solution architecture with Serverless, CloudFormation, Elasticsearch and SNS. Test-driven development with Mocha, Chai and SuperTest.
 - Leading agile planning and sprint reviews, presenting to stakeholders in Japan and America.
 - Successful long term "innovation time" visualisation project with Node.js, GitHub/Rally APIs, D3 and Grunt/Browserify/Babel.
 - DevOps support: infrastructure-as-code Jenkins rehosting, building a new source-controlled and self-serviced development environment with Chef.
- DEVELOPER**
JAN 15 - MAR 16

 **(NDA), London**
 - Full stack JavaScript and PHP development visualising complex data sets in D3 and beyond for the world's leading agency groups.
 - Co-lead introduction of code reviews, git flow and regular knowledge sharing presentations.
- DATA SCIENTIST**
NOV 14 - OCT 15

 **Relative Insight Ltd, Lancaster**
 - Developed Python web scrapers for high profile brands including Oxford University and Smirnoff. Published language normalisation algorithms for forums.
- INTERN**
JUN 14 - SEP 14

 **DataCentred Ltd, MediaCityUK, Manchester**
 - Co-delivered a customer facing support app in Ruby on Rails and AngularJS within 3 months, reflecting internal JIRA tickets in real-time (still in production). Implemented LDAP support in popular open source project phpipam.
- DEVELOPER**
JUN 13 - MAY 14

 **NextWorldWeb Ltd, InfoLab21, Lancaster**
 - Moved large legacy ecommerce systems to CakePHP, CS-Cart and WordPress. Automated WordPress theme creation from any site.
